This Rutherford vineyard consists of a well-drained Bale Clay loam.

---

### VINEYARD DESCRIPTION

The Quicksilver Vineyard lies on the western Rutherford bench, in the acclaimed winegrowing area on Bella Oaks Lane. The soils are predominantly well-drained loams that produce vines of moderate size. These older vines were planted to the California sprawl system, with wider spacing and a divided canopy, giving great exposure to the fruit. Minimal irrigation is needed to obtain maximum fruit potential from this vineyard.

### TASTING NOTES

This wine is packed with juicy flavors of boysenberry, chocolate-covered berries, and mineral accompanied by lush, mouth-filling tannins.
